

# HVREMSCO and HVREMAC Policy and Procedures Manual

Policy Name: <b>Specialty Care Transport</b>	
Policy Number: CP-12	
Approved by: REMAC	Effective Date: 6/5/2017
Revision Date(s):	Page 1 of 1

**Purpose:** To provide clarification for Agencies providing Specialty Care Transports.

Patient care is the direct responsibility of the transferring hospital and physician for all interfacility transfer of patients. Regardless of whether it is a routine or SCT transfer, it is the responsibility of the transferring hospital to determine the proper level of care required during these transports, and to ensure that the transporting agency and their personnel can provide the care necessary. The HVREMAC does not specifically credential any ALS providers or agencies to perform interfacility or SCT transfers, nor does it provide medical oversight of these services, involved personnel, or of the equipment and supplies used during such transfers.

The REMAC encourages any agency providing this service to develop protocols, procedures and training in conjunction with the agency medical director.
