

**CERTIFIED LAB INSTRUCTOR CANDIDATE SKILLS
SPONSORSHIP VERIFICATION**

Candidate Name: _____ Course Sponsorship: _____

Patient Lifting and Handling		Spinal Immobilization	
Stretcher Operations		Cervical collar placement	
Proper lifting and moving		KED	
Stair Chair Operations		Rapid Extrication and Indications	
Bed to Stretcher Lift		Long board – supine / Straps	
Scoop Stretcher		Long board – supine / Speed Clips	
Reeves Stretcher		Long board – supine / Spider Straps	
Emergency Moves		Straddle Slide	
Three-Person Log Roll		Helmet removal	
Removal of Long Board			
Movement/ Assistance- Bariatric Pts		Splinting	
		Long bone injury	
Patient Assessment		Joint injury	
Pulse Assessment & Locations		Sling and Swath	
Blood Pressure		Traction (HARE, Sager, KTD, Thomas, etc...)	
Respiratory Rate		Improvised Ankle Hitch	
Auscultation of Breath Sounds		Stabilizing Flail Segment	
Motor / Sensory Assessment		Patella Reduction	
Pupil Reaction to light			
Skin/ Color/Temperature/ Condition		Bleeding control/shock management	
Scene Size-Up / Primary Assessment		Bandaging Skills	
Trauma Assessment		Bleeding control evisceration	
Medical Assessment		Bleeding control (extremity)	
Demonstrate Stroke Scale		Occlusive dressing to chest	
		Bleeding control to the head	
Airway/Oxygen Administration		Impaled object management	
O2/regulator assembly		Quick Clot	
Nasal cannula		Tourniquet	
Non-rebreather		Stop the Bleed Program	
BVM/apnic patient		Wound Packing	
BVM / assisted ventilations			
Suction (adult & infant)		Emergency Childbirth	
Suction / Ventilation of a STOMA		Normal cephalic delivery	
OPA/NPA		Cord Presentation	
Mouth-to-mask w/oxygen		Breech Presentation	
Mouth-to-mask without oxygen		Limb Presentation	
Venturi Mask			
Pulse Oximetry			
AED/Cardiac Arrest			
Integrated cardiac arrest management			

Pediatrics		Medication Administration	
Pediatric Assessment Medical / Trauma		Knowledge of assisted inhaler	
Capillary Refill		Knowledge of nebulized albuterol	
OPA / BVM		Knowledge of assisted nitroglycerin	
Suctioning		Knowledge of oral glucose administration	
Oxygen Administration		Knowledge of Injectable Epi Pen	
Safe Transportation Devices		Knowledge of CPAP	
		Knowledge of Naloxone	
General Knowledge		Knowledge of Aspirin Administration	
Standard Precautions / ICS / WMD		Demonstrate use of Glucometer	
NYS DOH BEMS Student Manual			
NYS BLS / Collaborative Protocol Manual			
MIST Radio Report			
Trauma Protocol			
Local / Regional / State EMS Systems			

CLI candidates must be familiar with the contents of the Student Manual, NYS BLS protocols, Collaborative Protocols and SEMAC Advisories regarding BLS treatments; medications that EMT personnel can administer or assist in administering; and must be proficient in all skills called for in the EMT Instructor Guide including but not limited to those above.

A Course Sponsor’s Certified Instructor Coordinator and Course Administrator must verify and sign off that the CLI candidate has met the above requirements and has demonstrated competency with the above material prior to sponsoring the candidate for the CLI program.

During the CLI course, candidates will be required to comprehensively demonstrate knowledge and skills from the above material to course instructors and to the class. Failure to do so may necessitate remediation or constitute a failure in the CLI course.

Verification of Understanding:

“By signing below, I hereby indicate that I have read and understand the above conditions pertaining to the requirements of candidates entering the CLI Course, and I agree to abide by them.”
