Hudson Valley REMAC Advisory

2023-02

**If Trained and Equipped/
If Regionally Approved**

Issue Date: September 25, 2023

The following Medications are listed in the Collaborative Protocols as “May not be required in every Region”. The HV REMAC supports the use of these medications if they are approved by the ALS Agency’s Medical Director.

Medication	Paramedic	Critical Care	Advanced EMT
Ketamine Standing order for RSI	Paramedic only Medical Control option		
Haloperidol (Haldol)	Paramedic Medical Control option	Critical Care Medical Control option	
Etomidate (Amidate) Standing order for RSI	Paramedic Medical Control option	Critical Care Medical Control option	
Ketorolac (Toradol)	Paramedic	Critical Care	
Ondansetron ODT	Paramedic	Critical Care	
Nitrous oxide	Paramedic	Critical Care	Advanced EMT
Acetaminophen/Ibuprofen	Paramedic	Critical Care	Advanced EMT

The HVREMAC approved the placement of an orogastric (OG) tube in post Intubation management as per the Collaborative Protocols, if the ALS provider is trained and usage is approved by the Agency’s Medical Director.
